

KENO USA

LIVE KENO RESULTS ONLINE

Sample Keno Internet Display

Live Online Keno Results.

Keno USA is new way to play Keno! XpertX's Keno Information Network (KIN), automatically displays your Keno draws online in realtime. Players love the excitement and convenience of being able to watch live Keno results, check their tickets, and review past draws from anywhere in the world. The system is completely automatic and secure — as Keno draws are displayed on the in-house system, KIN posts them online.

PROMOTE MULTI-RACE PLAY

Keno results are displayed at www.kenousa.com. In addition, you can link players from your web page directly to your Keno display. Your casino and game has its own web address and unique screen design with your own casino logos, colors and game name. The display resembles a traditional Keno board, complete with a scolling center message display. Text advertisements and casino promotions can easily be uploaded directly from your Keno system for immediate display online.
