WE MAKE PROGRESSIVES EASY

- Easy to install — no new equipment to buy
- MegaKeno tickets are handled like any other keno ticket
- Runs on your existing game draw
- Minimal Risk — the casino is responsible only for the fixed “base” amount of each jackpot
- Progressive meters automatically show on the Vortex Video Display and also online at www.megakeno.com
- No long-term commitments, capital expense, or minimums required
- XpertX manages all associated audits

HOW IT WORKS

MegaKeno tickets are written like any other keno ticket and are won based on the game drawn at your casino. Participants are only responsible for small wins and the “base” portion of any jackpot hit at their own property.

- **Auditing and Payouts**
XpertX collects MegaKeno progressive contributions and per wager fees and is responsible for all associated audits. XpertX reimburses casinos for all progressive monies paid out.
- **Progressive Packages Available**
Package one — 5, 6 and 7 Spots
Package Two — 8 and 9 Spots
Mega10 — 10 Spot \$1 million Jackpot
(requires at least one other package)

- **Hidden Meters**

Each jackpot has a hidden meter internally accumulating funds that are then added to the "base" amount of the jackpot upon reset. This gives an immediate boost to the progressive total.

- **Cross Contributions**

Each MegaKeno wager increments all meters grouped with the package for the ticket played. After a hit, when play might normally slow, MegaKeno meters continue to grow because of the cross contributions from the other spots played within the package.

MEGA10 - INSURED MILLION DOLLAR TICKET

The latest addition to our MegaKeno line of progressive play is the Mega10 jackpot — an insured 10 Spot ticket with a starting value of \$1 million dollars. This new ticket offers the type of big payout Keno fans love, with minimal risk to the casino.
