

# MEGAKENO™

## XPERTX STATEWIDE LINKED PROGRESSIVE

### PAYTABLES

MegaKeno consists of two progressive packages. Package One features a 5, 6 and 7 spot ticket. Package Two offers an 8 and 9. We grouped them this way to enable the participation of properties whose aggregate limits are lower than the 8 and 9 spots' \$50,000 reset value.

### ADVANTAGES OF MEGA KENO

All of the spot groups in *Package One* (5, 6 and 7) contribute to each other as do the 8 and 9 spots in *Package Two*. This way, even after a hit, when play typically slows, the meter grows with contributions from the other spot groups in the package. Even better, all progressives have a hidden meter that accumulates in the background. When a progressive hits, the value reverts to the hidden meter rather than all the way down to the reset amount.

### MEGAKENO METERS

As part of the package, XpertX will modify your Vortex System to include our dynamic, custom metered progressives graphics.

### PAYMENTS

Participants are responsible for paying all small wins and the reset amount on any hit at their property. When a progressive hits, the casino pays the win, and we reimburse for the progressive portion contributions. XpertX invoices for, collects all progressive contributions, and reimburses all paid progressive increments monthly.

### AUDITING & LICENSING

XpertX holds an OILs License (Operator of Interlinked System) in the State of Nevada. Per this license, XpertX is the "operator" of the progressive and is directly responsible for the Linked Progressives and for all audits associated with the progressives.
